

## **In-Office Sedation**

**Obstetrics & Gynecology Associates of Hampton is excited to announce that we now offer in-office sedation!**

**This service is available to patients undergoing any in-office procedure, such as thermal ablation, in-office sterilization, hysteroscopy, colposcopy, LEEP, IUD insertion, and more**

- **A board-certified anesthesiologist administers the anesthesia for all of our office procedures.  
(<http://anesthesiaconnections.com/patients.html>)**
- **Recovery from office-based surgery is much quicker than from hospital-based surgery.**
- **The cost of office-based surgery is much less than from hospital-based surgery, since you will not have the added hospital bill.**
- **Great alternative for apprehensive patients. Reduces the stress of a procedure and increases your comfort during the treatment.**
- **In most cases, your insurance will cover some or all of the costs associated with the anesthesia. Your cost *should* be much less than in a hospital setting. Please contact your insurance provider to see if this is a covered expense.**
